vIDix SOFTWARE

The vIDix suite is a comprehensive integrated line of software products, designed to help you **"Secure the Workplace"**. This suite of products includes badge management software (IDimage), Access Control (IDaxxess), Visitor Management (IDvisitor), and Time Management (CelériTime). These products are designed to help manage access at your facility. Aside from the locks on your doors, the vIDix suite is **your first line of defense** in establishing a solid security plan.

With a IDimage **Badge Management software** you know who belongs and who doesn't. Employees wearing a photo ID badge are clearly identifiable. Badges can be used for electronic building access, to collect data, for time and attendance, or for transactions at a company store or cafeteria.

IDimage is a software package that allows you to **produce low cost photo identification badges**. These badges make it easy to identify every employee as they enter your facility and move throughout your building.

IDaxxess is a **comprehensive Access Control system** giving you the ability to control access to various areas of your facility. Eliminate changing locks and keys when you experience staffing changes or some-one has lost their keys. Just   deactivate the badge and you are done. IDaxxess will record any attempts made to continue using the deactivated badge/PIN.

IDvisitor is a **sophisticated visitor management solution**. With IDvisitor, visitors electronically scan their ID (business card or driver's license), and all relevant information about them is captured in a secure database file. The information collected can be a photograph, the name of the person being visited, the reason for the visit, and the time of the meeting. In just seconds, the person is   professionally checked in and a high quality visitor badge is automatically generated.

Over the last several years, hundreds of organizations (both large and small, public and private) have discovered the many benefits of replacing their outdated paper log with a **cost effective** visitor management system.

Time and Attendance at the Speed of Light. Managing your labor resources is crucial to ensuring the future success of your business. CelériTime provides the tools and real-time labor data necessary to pro-actively manage your workforce. This allows you to better manage your labor cost and improve productivity. CelériTime will provide the timely data necessary to make the right choices for your business.
